Tool and Research Ideas From RIPE NCC R&D

**Robert Kisteleki
RIPE NCC**

RIPE NCC R&D

- Research & Development is dedicated team at the RIPE NCC
- Responsible for event analyses, tools & prototypes, including
 - RIPE Atlas
 - RIPEstat
 - RIPE IPmap
 - lots of other tools and measurements including IXP Country Jedi, IPv6 RIPEness, RPKI webtest, RIS Live, and more
- We (like others) usually have more ideas than time...
- So, we're publishing some in case you are interested in pursuing them!

Some Ideas

- RIPE Atlas Anchor Auto-Monitoring
- Automatically Detecting Correlated RIPE Atlas Probe Behaviour
- Correlating RIPE Atlas Data with other Datasets
- Checking Locality of Well-Known Services

Some Ideas

- Where are We Missing RIPE Atlas Probes?
- Where are We Missing RIS Vantage Points?
- ASN/IP Dispersion Graphs/Statistics
- Improving IPv6 Topology Measurements
