

# Open Source for the IX-API

Marcos Sanz Grossón, DE-CIX

RIPE 82, Open Source wg, 18th May 2021

# IX-API in a nutshell

- Joint effort of AMS-IX, DE-CIX and LINX
- Create an industry standard to provision and configure interconnection services
- Started 2019, presented at RIPE 79, Rotterdam
- https://ix-api.net

### What happened since RIPE 79

- APIv2 introduced at EPF15 (Sept 2020):
  - Features: Peering + Cloud Connectivity, private VLANs and Closed User Groups
  - Not backwards compatible to v1
  - New abstraction/modularity to allow for future features without breaking changes
  - ...and truly cloud provider independent
- Adoption/deployment status:
  - AMS-IX, DE-CIX, Epsilon, DRT/InterXion, LINX, Netnod and others...

# IX-API OSS

- https://gitlab.com/ix-api
- 8 Projects, 0 private repositories:
  - Schema
  - Test suite
  - Reference Client
  - Sandbox (IXP emulator)
  - Website/Hosting configuration/Doc...
- Apache 2.0, Python+Django/Django REST
- RESTful, OpenAPI, JSON&YAML specs
- Ca 3000 commits, 42k LoC

# **IX-API Client**

- A python client for the IX-API used by the test suite.
- An (ipython) shell with an interactive API session.
- Currently v2 only
- Live demo against DE-CIX productive server to live provision an AWS cloud circuit:

#### IX-API order AWS Direct Connect

#### IX-API order AWS Direct Connect

- 1. Query product catalog (bandwidth, region...)
- 2. Create Cloud virtual circuit
- 3. Create individual VLANs on circuit

GET /product-offerings
POST /network-services
POST /network-service-configs
